SUMMARY

Junior Software Developer with a technical education acquired through mentorship by a senior engineer, independent study, and a software development bootcamp. Takes pride in giving clear explanations of technical concepts to non-technical audiences. Proficient in full stack development using ReactJS and Flask. Proactively building new skills, currently exploring system design and secure coding practices to strengthen full stack capabilities. Seeking a professional opportunity to fuse my knowledge of Java, JavaScript, and Python with my passion for building systems.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript, Python, SQL, HTML/CSS | React, Spring Boot, Flask | Data Structures and Algorithms, VSCode, IntelliJ, Git, Test-Driven Development, Pair Programming

EXPERIENCE

Locker - A Storage Management App — LaunchCode Capstone Project

- Developed an application that allows users to keep track of their items in storage
- Designed a JSON data structure and defined its constituent relationships, simulating CRUD functions and data persistence of a true relational database
- Utilizing JSON server to perform dynamic updates to the JSON file, hosted on Render
- Developed modals that allow users to add and delete storage lockers, containers, and containers' items, leveraging React hooks to perform real time updates
- Full Project Tech Stack: ReactJS, React Router, HTML/CSS, Netlify, Render, JSON server

Recipe Generator Application — Developed independently with QA by a Senior SWE

- Designed an application that enables users to generate a shopping list from user-entered recipes
- Developed a script using Pint that performs unit conversions to basic weight and volume measurements
- Built UIs that allow users to create, enter, and edit recipes, and choose recipes for recipe reduction and shopping list generation
- Full Project Tech Stack: ReactJS, React Router, Flask, Pint for Flask, HTML/CSS, SQLAlchemy, SQLite

Patient Scheduling Specialist — UW Health

September 2024 - April 2025

- Communicated with clinic managers and clinical providers to refine scheduling workflows
- Executed coordination of patient appointments and administrative tasks
- Facilitated patient care utilizing Epic Systems' software

Line Cook — Seoul Taco

June 2023 - August 2024

- Collaborated with food truck staff to determine menu offerings and quantities to maximize profits and minimize waste
- Performed food truck operations in a variety of roles: dish station, equipment maintenance, grill, line assembly, and cash register
- Maintained high standards of customer service at diverse settings: festivals, corporate events, PGA Tour, private parties, and wedding receptions

Apprentice Plumber — Plumbers and Pipefitters Local 562

August 2021 - June 2023

- Supported operations in large commercial builds and remodels—St. Louis City Park, real estate development, hospitals and clinics
- Performed tedious tasks requiring long hours, allowing journeymen plumbers to focus on installation of piping systems
- Received material deliveries, caulked floors, core drilled, insulated and fireproofed floor and wall penetrations

Delivery Driver — Uber Eats

January 2021 - December 2022

- Managed schedule efficiently to ensure timely deliveries
- Maintained customer service through friendliness and accommodation of customer requests

Warehouse Associate — Amazon, Inc.

May 2020 - August 2020

- Fulfilled package sorting, scanning, and boxing processes
- Supported operational efficiency by hitting target metrics for shipment volume

Project Intern — Walsh Group

May 2019 - January 2020

- Assisted with RFI's, Submittals, and Safety Reports
- Optimized organizational systems for architectural blueprints

EDUCATION

LaunchCode, Software Development, 2025

Independent Study, Software Development, 2022-2025

- Engaged in intensive, independent study for 25-30 hours weekly under the guidance of a Senior Software Engineer, earning a [Letter of Recommendation](#). Gained proficiency in Python, Flask, SQL, JavaScript, ReactJS, HTML, CSS, Data Structures and Algorithms, and Relational Databases

Ranken Technical College, Certificate in Plumbing Technology

University of Missouri, Business Administration
